

ABSTRACT OF THE DISCLOSURE

It is disclosed a cement paint comprising a pigmenting substance (2), a cement
5 binder (6) and a fluidizing liquid (4) and further comprising: a calcareous
aggregate (7) including calcareous granules of calcium carbonate CaCO_3 having
maximum sizes smaller than 100 microns, a vitreous aggregate (8) including
vitreous granules having maximum sizes smaller than 100 microns, and a
photocatalyst (9) adapted to oxidize polluting substances in the presence of light
10 and air.
